## **DETAILED ACTION**

### ***Acknowledgment***

1. This Office Action is responsive to the Amendment filed on 8/27/2007.

### ***Claim Objections***

2. Claim 14 is objected to because of the following informalities:

At line 2, "360E/N" is suggested to change to – 360°/N --.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3, 12-14, 18, 29 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen (US 6,606,365).

Regarding claims 1-3, 12-14, 18, 29 and 30, Chen, as shown in figure 3, teaches a method and apparatus comprising clock generator (50) and sampling unit (52) to sample data the input data stream using the clock phases generated

by the clock generator (50). See also column 1, lines 51-57 and column 4, lines 15-22.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 10, 11, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen (US 6,606,365).

Regarding claims 10, 11, 21 and 22, Chen teaches all subject matter claimed except for further teaches the system being used for receiving the optical

data stream and converted to electrical data stream before sampling. However, it is well known in the art to have an optical to electrical converter for electrically processing the received optical signal. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Chen by employing an optical to electrical converter if it is desired to use the system to receive an optical signal and such modification would not involve any inventive feature to do so.

#### ***Allowable Subject Matter***

8. Claims 23, 25, 26 and 28 are allowed over prior art of record.
9. Claims 4-9, 15-17, 19, 20 and 31-38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

10. Applicant's arguments with respect to claims 1-3, 10-14, 18, 21, 22, 29 and 30 have been considered but are moot in view of the new ground(s) of rejection.
